

Release name			
Epic name		Sprint 18-2	Sprint 18-3
 Analytics			<div>connect visitor analytics and user analytics using Alias element (see attached google doc)   <span>Ready for Jira</span>   Pavel Belyantsev</div> <div>fix analytics in GridTeam in Android   <span>Ready for Jira</span>   Vladimir Novikov</div> <div>fix analytics in GridTeam in iOS   <span>Ready for Jira</span>   Yuri Shakula</div> <div>modify analytics in SelfServ   <span>Ready for Jira</span>   Pavel Belyantsev</div>
	 Alerting (aka Mass Notifications)	<div>Build notification memberService and communityService   <span>Closed</span>   James Cooper</div> <div>Create an API to change notification policy delivery transport   <span>Closed</span>   James Cooper</div> <div>Create an API to configure Notification Delivery Transport   <span>Closed</span>   James Cooper</div> <div>Create an API to receive current set of notification policies   <span>Closed</span>   James Cooper</div> <div>Create individualNotification build deliveryRequest   <span>Closed</span>   James Cooper</div> <div>Create individualNotification policyLookup   <span>Closed</span>   James Cooper</div> <div>Create individualNotification queue processor   <span>Closed</span>   James Cooper</div> <div>Design DB schema for notification-service   <span>Closed</span>   James Cooper</div> <div>Design notification core models   <span>Closed</span>   James Cooper</div> <div>Implement communityNotification policyLookup   <span>Closed</span>   James Cooper</div> <div>Implement communityNotification queue processor   <span>Closed</span>   James Cooper</div> <div>Implement communityNotification splitter (split community into individual users)   <span>Closed</span>   James Cooper</div> <div>Migrate Schedule individual notification logic from API Server to notification-service   <span>Closed</span>   James Cooper</div> <div>Migrate Send community notification logic from API Server to notification-service   <span>Closed</span>   James Cooper</div> <div>NotificationRequest build processor (read and store inbound notificationRequest and return notificationId)   <span>Closed</span>   James Cooper</div> <div>Redesign Delivery Policies   <span>Closed</span>   James Cooper</div> <div>Redesign notification process flow   <span>Closed</span>   James Cooper</div> <div>Separate communityNotifications from individualNotifications publish on separate queues   <span>Closed</span>   James Cooper</div> <div>Separate Delivery, Ack and Reply tracking information   <span>Closed</span>   James Cooper</div> <div>Update delivery policy   <span>Closed</span>   James Cooper</div>	<div>To provide richer alerting capability to users, we need to first build new mass notification service   <span>Idea</span>   James Cooper</div>
 Authentication		<div>All security keys / tokens must be requested from backend system in Android code   <span>Closed</span>   Vladimir Novikov</div> <div>All security keys / tokens must be requested from backend system in iOS code   <span>Closed</span>   Yuri Shakula</div> <div>Create authentication-service prototype using Spring Boot &amp; Spring Security   <span>Closed</span>   Oscar Aloff</div>	<div>authentication-service: Add custom user attributes like User ID to the Access Token   <span>Ready for Jira</span>   Oscar Aloff</div> <div>authentication-service: Create OAuth2 Authorization Code Flow prototype using OKTA Identity provider   <span>Ready for Jira</span>   Oscar Aloff</div> <div>authentication-service: Create OAuth2 Authorization Code with PKCE Flow prototype using OKTA Identity Provider   <span>Ready for Jira</span>   Oscar Aloff</div> <div>authentication-service: Create OAuth2 Client Credentials Flow prototype using OKTA Identity Provider   <span>Ready for Jira</span>   Oscar Aloff</div> <div>authentication-service: Create OAuth2 Implicit Flow prototype using Okta Identity Provider   <span>Tech Definition</span>   Oscar Aloff</div> <div>authentication-service: Create OAuth2 Resource Owner Password Grant Flow prototype using OKTA identity provider   <span>Ready for Jira</span>   Oscar Aloff</div> <div>authentication-service: Get user info from Okta's access token   <span>Ready for Jira</span>   Oscar Aloff</div> <div>authentication-service: Implement sample @PreAuthorize role restriction against Okta   <span>Ready for Jira</span>   Oscar Aloff</div> <div>authentication-service: Integrate Spring Security with Okta   <span>Ready for Jira</span>   Oscar Aloff</div> <div>authentication-service: Research getting the AccessToken via user credentials from Okta   <span>Ready for Jira</span>   Oscar Aloff</div> <div>Evaluation: Create authentication-service prototype using OKTA service   <span>Ready for Jira</span>   Oscar Aloff</div> <div>Prepare questions and use cases to discuss with OKTA's solutions team   <span>Ready for Jira</span>   Oscar Aloff</div>
 Bots	<div>create CLI -&gt; grid-call-service integration testing (JC)   <span>Closed</span>   James Cooper</div> <div>create CLI -&gt; grid-call-service integration testing (OA)   <span>Resolved</span>   Oscar Aloff</div> <div>finalize: mute/unmute/add/remove conference commands   <span>Resolved</span>   Oscar Aloff</div> <div>implement a conference participants list flow   <span>Resolved</span>   Oscar Aloff</div> <div>provide cli-service prod release support   <span>Resolved</span>   Oscar Aloff</div> <div>provide skype-integrator release support   <span>Resolved</span>   Oscar Aloff</div> <div>provide spark-integrator release support   <span>Resolved</span>   Oscar Aloff</div>		
 CI / CD	<div>provide api-gate prod release support   <span>Resolved</span>   Oscar Aloff</div> <div>provide email-service prod release support   <span>Resolved</span>   Simon Fox</div> <div>provide onboarding-service prod release support   <span>Resolved</span>   Simon Fox</div> <div>provide self-serv prod release support   <span>Resolved</span>   Pavel Belyantsev</div> <div>research Interface testing for Cloud Stream interfaces   <span>Resolved</span>   Oscar Aloff</div>	<div>build a CI / CD pipeline for SelfServ   <span>Closed</span>   Simon Fox</div> <div>create Case Management integration tests   <span>Closed</span>   James Cooper</div> <div>create Case Management interface tests   <span>Closed</span>   James Cooper</div> <div>create onboarding service integration tests   <span>Closed</span>   Simon Fox</div> <div>create onboarding service interface tests   <span>Closed</span>   Simon Fox</div> <div>design testing framework   <span>Closed</span>   Oscar Aloff</div> <div>implement testing framework   <span>Closed</span>   Oscar Aloff</div> <div>improve Case Management unit test coverage   <span>Closed</span>   James Cooper</div> <div>improve onboarding service unit test coverage   <span>Closed</span>   Simon Fox</div>	
 DevOps			<div>configure NewRelic to monitor AWS billing   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>Create new API server node in dedicated prod multi AZ VPC   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>Create new API server node in dedicated prod multi AZ VPC (possible duplicate)   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>POC-II of CI pipeline for on-boarding service   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>QA environment design   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>Review Current AWS server list   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>Spring 18/5 Environments support (Prod/Dev/DevOps)   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>Spring 18-5 Services releases   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div>
 Email			<div>Mail transport migration to the MailGun   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>Migrate functionality to Send Escalation Email from API server to Email-Service   <span>Ready for Jira</span>   Simon Fox</div>
 Geolocation		<div>User wants to enable location sharing only for limited period of time in Android code   <span>Closed</span>   Vladimir Novikov</div> <div>User wants to enable location sharing only for limited period of time in iOS code   <span>Closed</span>   Yuri Shakula</div>	
 Grid-Calls	<div>migrate to V2 MPS Calls for Grid-Call-Service   <span>Closed</span>   James Cooper</div> <div>provide call server production release   <span>Released to PROD</span>   Vasy! Kutishchev</div>		
 Push-to-Talk		<div>Fix massive authentication errors (401) from PPT service in Android code   <span>Closed</span>   Vladimir Novikov</div> <div>Fix massive authentication errors (401) from PPT service in iOS code   <span>Closed</span>   Yuri Shakula</div>	
 Tasking	<div>change notification submit for direct calls to subscriptions   <span>Closed</span>   James Cooper</div> <div>complete architecture gap analyses for Case Mgmt   <span>Closed</span>   James Cooper</div> <div>design flow Notification Reply to trigger Case Management actions   <span>Resolved</span>   James Cooper</div> <div>design Task Acceptance flow   <span>Resolved</span>   James Cooper</div> <div>design Task template entity   <span>Resolved</span>   James Cooper</div> <div>provide Case Management Acceptance testing support   <span>Resolved</span>   James Cooper</div>		<div>Prepare Case Management for Production Release   <span>Ready for Jira</span>   James Cooper</div>
 Product-n-Development-Mgmt	<div>confirm we have moved over any open issues from previous jira account, so we can shut down old jira instance   <span>Resolved</span>   Vasy! Kutishchev</div>	<div>consolidate any dev ops tasking into new jira account   <span>Closed</span>   Alex Tyrtynchnyi</div>	
 Platform			<div>Review capability to use S3 storage system as template source   <span>Ready for Jira</span>   Simon Fox</div>
 User-Mgmt (aka Identity)		<div>create workspace member list / add member profile integration testing   <span>Closed</span>   Simon Fox</div> <div>implement service to reset password by coordinator request for onboarding   <span>Closed</span>   Simon Fox</div>	<div>add text under the Get Started button   <span>Ready for Jira</span>   Pavel Belyantsev</div> <div>(B) User wants ability to modify their own profile information   <span>Released to PROD</span>   Mike Mayer</div> <div>(C1) Admin wants ability to view members in their organization   <span>Closed</span>   Mike Mayer</div> <div>(C3) Admin wants ability to set role (admin/member) of users   <span>Closed</span>   Mike Mayer</div> <div>(C4) Admin wants ability to reset passwords of users belonging to organization   <span>Closed</span>   Mike Mayer</div> <div>(C6) Admin wants ability to delete members from organization   <span>Closed</span>   Mike Mayer</div> <div>(D2) Admin wants ability to view/select notification categories   <span>Closed</span>   Mike Mayer</div> <div>design Change Member profile service for Onboarding   <span>Closed</span>   Simon Fox</div> <div>Fix names for the 'Manage Alerts' page -- page header and link in sidebar should be set to Manage Alerts   <span>Ready for Jira</span>   Pavel Belyantsev</div> <div>match external header on setup.blg.com to marketing site   <span>Ready for Jira</span>   Pavel Belyantsev</div> <div>modify existing new user wizard   <span>Ready for Jira</span>   Pavel Belyantsev</div> <div>Try organizations can create up to 50 Users and 50 Communities   <span>Closed</span>   Mike Mayer</div> <div>user wants a clearer instruction that fields with RED asterisk are required   <span>Ready for Jira</span>   Pavel Belyantsev</div>
	<div>add Reset Password action   <span>Released to PROD</span>   Pavel Belyantsev</div> <div>add user role column to org list result   <span>Released to PROD</span>   Pavel Belyantsev</div> <div>add user role column to org list result   <span>Released to PROD</span>   Simon Fox</div> <div>add user role parameter to update user service   <span>Released to PROD</span>   Simon Fox</div> <div>Copy edit: change Agency = Team   <span>Resolved</span>   Default (Unassigned)</div> <div>Copy edit: Change Agency to Team on Get Starred page   <span>Released to PROD</span>   Default (Unassigned)</div> <div>Copy edit: Change Meta title for page   <span>Released to PROD</span>   Default (Unassigned)</div> <div>Copy edit: Change Officers to Coworkers   <span>Released to PROD</span>   Default (Unassigned)</div> <div>create a service to reset user password by coordinator request   <span>Released to PROD</span>   Simon Fox</div> <div>create mockup for group actions   <span>Released to PROD</span>   Pavel Belyantsev</div> <div>create update member profile service implementation   <span>Resolved</span>   Simon Fox</div> <div>implement member modify form   <span>Released to PROD</span>   Pavel Belyantsev</div> <div>implement service to reset password by coordinator request   <span>Resolved</span>   Simon Fox</div> <div>Lockout Error Bug   <span>Released to PROD</span>   Default (Unassigned)</div> <div>move freemium cap to 50 users for organizations   <span>Released to PROD</span>   Default (Unassigned)</div> <div>provide template-service prod release support   <span>Released to PROD</span>   Oscar Aloff</div> <div>UI Bug: Menu Collapse Error   <span>Released to PROD</span>   Vasy! Kutishchev</div> <div>update add user service to accept user role   <span>Released to PROD</span>   Simon Fox</div> <div>update member add form with User Role field   <span>Released to PROD</span>   Pavel Belyantsev</div> <div>user, after signing in, should be greeted with a homepage that offers some key actions   <span>Closed</span>   Pavel Belyantsev</div>	<div>Add Usability Element: https://setup.bluelinegrid.com/edit-profile   <span>Closed</span>   Pavel Belyantsev</div> <div>Copy edit: Congratulations toaster   <span>Closed</span>   Pavel Belyantsev</div> <div>Copy edit: Password update   <span>Closed</span>   Pavel Belyantsev</div> <div>Copy edit: Remove full screen icon   <span>Closed</span>   Pavel Belyantsev</div> <div>Enable Prod Configuration Server encryption   <span>Closed</span>   Alex Tyrtynchnyi</div> <div>False Positive Bug: When user adds email addresses on separate lines during bulk upload, form allows user to complete submit process but it in fact fails   <span>Closed</span>   Pavel Belyantsev</div> <div>implement tracking plan for Self Serve site   <span>Closed</span>   Pavel Belyantsev</div> <div>UI Bug: Toaster Error   <span>Closed</span>   Pavel Belyantsev</div>	<div>Environments support (Prod/Dev/DevOps)   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div> <div>Services releases   <span>Ready for Jira</span>   Alex Tyrtynchnyi</div>
