BLG Product Dec 11th to 15th	BLG Product Sprint 18-2	BLG Product Sprint 18-3	BLG Product Sprint 18-5
Dec 15, 2017 Shipped	Jan 12, 2018 Shipped	Jan 19, 2018 Shipped	Feb 02, 2018 Planning
Goals enable automated continuous delivery	Goals enable automated continuous delivery	Goals enable automated continuous delivery	Goals self-service organization account onboarding
self-service organization account onboarding grow acquisition metric by 300%	self-service organization account onboarding grow acquisition metric by 300%	self-service organization account onboarding complete tasking feature	Epics Alerting (aka Mass Notifications)
Epics	complete tasking feature complete demo-ready chatbot feature	Epics Alerting (aka Mass Notifications)	Analytics Authentication DevOps
Stories	manage tech debt	Authentication CI / CD Geolocation	♣ Email♣ Platform♣ Tasking
Scheduled BLG-365 evaluate proposed tech for mobile client development	Bots CI / CD Grid-Calls	♣ Product-n-Development-Mgmt♣ Push-to-Talk♣ User-Mgmt (aka Identity)	♣ User-Mgmt (aka Identity)
Closed	♣ Product-n-Development-Mgmt♣ Tasking	Stories	Ready for Jira
BLG-224 user should be able to submit password change form (SELFSERV)	Stories Released to PROD	BLG-527 Create an API to configure Notification Delivery Transport	BLG-572 Fix names for the 'Manage Alerts' page page header and link in sidebar should be set to Manage Alerts
BLG-225 implement password change api integration	BLG-331 update add user service to accept user role	BLG-526 Create an API to change notification policy delivery transport	BLG-567 connect visitor analytics and user analytics using Alias element
BLG-222 implement add member user form	BLG-366 move freemium cap to 50 users for organizations	BLG-525 Create an API to receive current set of notification policies	(see attached google doc) BLG-569 fix analytics in GridTeam in
BLG-223 implement access by password reset link	BLG-322 update member add form with User Role field	BLG-500 Implement communityNotification queue	Android BLG-474 modify existing new user
BLG-212 finalize Add Member API	BLG-330 add user role column to org list result	processor	wizard
calls for onboarding BLG-228 add generation of password	BLG-332 add user role parameter to update user service	BLG-226 create workspace member list / add member profile integration testing	BLG-344 configure NewRelic to monitor AWS billing
schange are geteration up pesswort that the standard are geteration to the standard are geterated by coordinator role.	BLG-323 add Reset Password action	BLG-499 Implement communityNotification spliter (split community into individual users)	BLG-510 Prepare Case Management for Production Release
	BLG-333 create a service to reset user password by coordinator request	BLG-498 Implement communityNotification policyLookup	BLG-513 authentication-service: Create OAuth2 Authorization Code with PKCE Flow prototype using OKTA Identity Provider
	BLG-300 provide call server production release	BLG-497 Create individualNotification	BLG-518 Spring 18/5 Environments support (Prod/Dev/DevOps)
	BLG-364 Copy edit: Change Agency to Team on Get Stared page	BLG-496 Create individualNotification	BLG-514 authentication-service: Create OAuth2 Resource Owner
	BLG-363 Copy edit: Change Meta title for page	policyLookup BLG-495 Create individualNotification	Create OAuth2 Resource Owner Password Grant Flow prototype using OKTA identity provider
	BLG-362 Lockout Error Bug BLG-324 add user role column to org	queue processor BLG-494 Separate	BLG-515 authentication-service: Create OAuth2 Authorization Code Flow prototype using OKTA Identity provider
	list result BLG-357 Copy edit: Change Officers to	communityNotifications from individualNotifications publish on separate queues	BLG-516 authentication-service:
	Coworkers BLG-314 provide template-service prod	BLG-493 Update delivery policy	Create OAuth2 Client Credentials Flow prototype using OKTA Identity Provider
	release support BLG-355 UI Bug: Menu Collapse Error	BLG-492 Design notification core models	BLG-517 Prepare questions and use cases to discuss with OKTA's solutions team
	BLG-321 implement member modify form	BLG-491 Design DB schema for notification-service	BLG-519 Review Current AWS serve
	BLG-325 create mockup for group actions	BLG-490 Redesign notification process flow	BLG-520 Spring 18-5 Services releases
		BLG-489 Build notification memberService and communityService	BLG-521 POC-II of CI pipeline for on boarding service
	BLG-341 user, after signing in, should be greeted with a homepage that	BLG-488 NotificationRequest build processor (read and store inbound	BLG-522 QA environment design
	offers some key actions BLG-219 create CLI -> grid-call-service integration testing (JC)	notificationRequest and return notificationId)	BLG-523 Create new API server node in dedicated prod multi AZ VPC
	BLG-221 complete architecture gap	BLG-388 User wants to enable location sharing only for limited period of time in iOS code	(possible duplicate) BLG-528 Migrate functionality to Sen
	analyses for Case Mgmt BLG-220 change notification submit for	BLG-386 All security keys / tokens must be requested from backend system in iOS code	Escalation Email from API server to Email-Service
	direct calls to subscriptions BLG-230 migrate to V2 MPS Calls for	BLG-443 All security keys / tokens must be requested from backend	BLG-529 Review capability to use S3 storage system as template source
	Grid-Call-Service	system in Android code BLG-440 Enable Prod Configuration	BLG-531 authentication-service: Research getting the AccessToken via user credentials from Okta
	Resolved BLG-308 design Task template entity	Server encryption BLG-445 Fix massive authentication errors (401) from PPT service in	BLG-532 authentication-service: Add custom user attributes like User ID the Access Token
	BLG-306 provide Case Management	Android code BLG-384 Fix massive authentication	BLG-533 authentication-service: Implement sample @PreAuthorize role restriction against Okta
	Acceptance testing support BLG-310 design flow Notification Reply	errors (401) from PPT service in iOS code	BLG-534 authentication-service:
	to trigger Case Management actions	BLG-416 Separate Delivery, Ack and Reply tracking information	Integrate Spring Security with Okta BLG-535 authentication-service: Get
	BLG-309 design Task Acceptance flow BLG-326 provide email-service prod	BLG-404 Migrate Send community notification logic from API Server to notification-service	user info from Okta's access token BLG-436 Evaluation: Create
	release support BLG-317 provide spark-integrator	BLG-213 implement service to reset password by coordinator request for onboarding	authentication-service prototype using OKTA service
	release support	BLG-447 build a CI / CD pipeline for	BLG-442 Mail transport migration to the MailGun
	BLG-305 implement service to reset password by coordinator request	SelfServ BLG-437 Create authentication-service	BLG-441 Create new API server nod in dedicated prod multi AZ VPC
	BLG-227 create update member profile service implementation	prototype using Spring Boot & Spring Security	BLG-439 Services releases BLG-438 Environments support
	BLG-201 create CLI -> grid-call-service integration testing (OA)	BLG-444 User wants to enable location sharing only for limited period of time in Android code	(Prod/Dev/DevOps) BLG-449 add text under the Get Started button
	BLG-349 Copy edit: change Agency = Team	BLG-405 Migrate Schedule individual notification logic from API Server to notification-service	BLG-473 modify analytics in SelfServ
	BLG-316 provide cli-service prod release support	BLG-419 Redesign Delivery Policies	BLG-448 match external header on setup.blg.com to marketing site
	BLG-320 provide self-serv prod release support	BLG-450 implement tracking plan for Self Serve site	BLG-472 fix analytics in GridTeam in iOS
	BLG-28 confirm we have moved over any open issues from previous jira	BLG-283 consolidate any dev ops tasking into new jira account	BLG-342 user wants a clearer instruction that fields with RED
	account, so we can shut down old jira instance	BLG-358 Copy edit: Congratulations toaster	asterisk are required
	BLG-327 provide onboarding-service prod release support	BLG-311 create Case Management interface tests	Idea BLG-570 To provide richer alerting
	BLG-315 provide api-gate prod release support	BLG-307 improve Case Management unit test coverage	capability to users, we need to first build new mass notification service
	BLG-318 provide skype-integrator release support	BLG-329 create onboarding service integration tests	Tech Definition
	BLG-319 research Interface testing for Cloud Stream interfaces	BLG-354 Copy edit: Remove full screen icon	BLG-512 authentication-service: Create OAuth2 Implicit Flow prototype using Okta Identity Provider
	BLG-203 implement a conference	BLG-334 create onboarding service interface tests	Closed
	participants list flow BLG-202 finalize:	BLG-328 improve onboarding service unit test coverage	BLG-540 (D2) Admin wants ability to view/select notification categories
	mute/unmute/add/remove conference commands	BLG-313 create Case Management integration tests	BLG-463 (C6) Admin wants ability to delete members from organization
		BLG-359 Copy edit: Password update	BLG-462 (C4) Admin wants ability to reset passwords of users belonging
		BLG-361 False Positive Bug: When user adds email addresses on separate lines during bulk upload,	to organization BLG-461 (C3) Admin wants ability to
		form allows user to complete submit process but it in fact fails	set role (admin/member) of users BLG-460 (C1) Admin wants ability to
		BLG-360 Add Usability Element:	view members in their organization BLG-215 design Change Member
		https://setup.bluelinegrid.com/edit- profile	profile service for Onboarding

BLG-209 implement testing framework

BLG-434 Try organizations can create up to 50 Users and 50 Communities

Released to PROD

BLG-459 (B) User wants ability to modify their own profile information
